An Oldcastle Company

Oldcastle®

The Secure-Weld® and Secure-Weld® Plus line of fence systems from Merchants Metals provides a complete selection of welded ornamental steel choices for homeowners and businesses looking for an attractive, high quality, low maintenance fence solution.

Secure-Weld® features pickets and rails welded together to provide dependable strength and security while minimizing installation time.

Secure-Weld® Plus begins with the same welding process but utilizes pre-galvanized steel which creates an added layer of protective coating. This additional protection affords the end user peace of mind knowing that their new fence is backed by a 10 year warranty.

Secure-Weld® Plus face welded panels are also available in Fully Rackable designs. This optional feature allows panels to have 48" of rackability in an 8' section.

After the welding process, all Secure-Weld® and Secure-Weld® Plus products are sent through our state-of-the-art powder coating line where the material gets cleaned in a five-stage wash process before being coated with a primer and TGIC polyester top coat. This process guarantees you will receive an ornamental system with one of the best coatings available today.

Monroe 2 Rail Fence Style

Bracket system ensures easy installation without the need to weld in the field.

Panels and gates are welded prior to powder coating to ensure that all parts of your fence will be protected.
